A CR2032 "coin-style" lithium battery is included and pre-installed. A protective strip that prevents the battery from draining during shipping must be removed from the battery compartment before you can begin using your digital window thermometer.

1. Remove the two small Phillips type screws with a small Phillips screwdriver.
2. Remove the battery compartment cover carefully as to not lose the screws.
3. Remove the small plastic tab from the battery compartment (initial setup only). To replace battery, remove and safely discard the old battery (see disposal safety info below). Insert a new CR2032 battery, paying close attention to the polarity markings.
4. Replace the battery compartment cover and screws, making sure the battery is still installed correctly.

DO NOT recharge non-rechargeable batteries. DO NOT short-circuit the supply terminals. Battery contains mercury. Do not put in trash. Recycle or manage as hazardous waste.

Placement

AcuRite products are sensitive to surrounding environmental conditions. Placement in a proper location is critical to the accuracy of this product. To ensure accurate temperature measurement, place out of direct sunlight and away from heat sources.

Window Mount

Clean the area where the suction cups will be adhered to with a household window cleaner. Be sure window is free of oil, grease, dust or other matter. Moisten the suction cups. To mount, push firmly on the thermometer, pressing it against the window to form a strong suction. For best suction, select surface that is hard, smooth and non-porous. Do not use suction cups on wood or plaster.

MIN/MAX Reset

The MIN/MAX temperature readings will reset every 24 hours. The reset time is based on when the thermometer was powered on. For example, if you power on the thermometer at 4:30 PM on Monday, the MIN/MAX readings will be reset at 4:30 PM Tuesday (24 hours later).

Troubleshooting

Problem	Possible Solution
Unable to read thermometer at night	We recommend placing a piece of white paper on the back of the thermometer. It will not affect the accuracy of the unit.
